

CSI TECHNOLOGY GROUP

InfoShare Select

OUR MISSION

CSI Technology Group is dedicated to the development of premium case and document management systems utilizing the most advanced software technology to support our clients in state and county agencies.

InfoShare, CSI's leading software integrates the applications of records management, document management, word processing and criminal mug shot systems into one single total solution, specially designed for the criminal justice community.

The InfoShare system for **Jail Management** is an extensive records management system whose functions include records management, document management, bar coding, word processing and criminal mug shot systems as well as a fingerprint identification system.

Currently serving court administration, prosecution, public defender and sheriff offices throughout New Jersey, and state agencies in Hawaii and New Mexico, we aim to become a leading application service provider to law enforcement agencies throughout the United States.

Our efforts are rewarded by satisfied clients, our contribution to government efficiencies and the administration of justice for all.

Jail Management

FEATURES

- **Security** is enhanced through our Intranet system because users never have direct access to files at the operating system level. They receive their data from the Web Server, isolating them from the true data source through a custom interface enhancing the visual experience.
- InfoShare provides “**point and click**” access to any documents and/or files pertaining to new and old records as well as for internal departmental messaging.
- InfoShare is **fully customizable** to meet the individual needs of every Jail, Sheriff's Department, Police Department and all other law enforcement agencies.
- Our system was designed using industry standard software that provides **maximum flexibility to integrate with your current databases**. Software can include, but is not limited to: Microsoft Internet Explorer, Netscape Navigator, Windows 98/2000/XP, Adobe Acrobat, Java, ActiveX.
- InfoShare is **user friendly** and simplifies all complex case processes, saving up to 80% in processing time.

InfoShare

CONTENTS

- 

• **Intake:** A module that tracks and records all incoming inmate information and photo images and allows for the retrieval of previous booking information for each inmate.
- 

• **Booking:** A module that tracks and records all arrest and bond information for each arrestee and provides an inventory and receipt for any personal property and money belonging to that person.
- 

• **Medical Screening:** A module that screens arrestees on their medical conditions and tracks any ailments or medication an arrestee may have.
- 

• **Identification:** This module allows an officer to take digital photographs of each arrestee and interfaces with the fingerprint identification system of the jail.
- 

• **Classification:** A module that tracks additional information on each inmate's background and behavior to determine an appropriate housing assignment for them.
- 

• **Housing Unit:** The housing unit module accounts for the current whereabouts of every inmate in each housing unit in the jail.
- 

• **Inmate Discipline:** This module tracks and reports any misconduct reported for an inmate and records the result of any investigations conducted.
- 

• **Line-Up:** A function that allows for line ups to be created using a set range of characteristics so that victims and witnesses of a particular crime may use the line up to identify a suspect.
- 

• **Visitation:** This module tracks all people visiting inmates in the jail. In addition, this module will allow for the checking of any outstanding warrants a visitor may have.
- 

• **Commissary:** This module allows eligible inmates to purchase certain items such as food from the commissary and interacts with the Accounting module which tracks all available money an inmate has to spend.
- 

• **Health Services:** A module that tracks and schedules any medical or mental health appointments an inmate may have in the jail infirmary or mental health services division.
- 

• **Property & Clothing:** A module that tracks and records any clothing or other personal property recorded as belonging to an inmate when they were first booked into the jail.
- 

• **Inmate Grievance:** This module tracks any grievances an inmate may wish to file against another inmate and tracks any deadlines required for resolution of the complaint.
- 

• **Transportation:** A module that records all inmate transportation from the jail to other facilities such as court or the hospital.
- 

• **Court Liaison:** This module schedules inmates for court hearings, records offense dispositions and calculates the scheduled release date for each offense disposition recorded for an inmate.
- 

• **Jail Courtroom:** This module allows users to schedule an inmate for any court or bench hearings they may have.
- 

• **Events Scheduling:** A module that tracks all events scheduled in the jail such as medical or mental health visits and court appointments for each inmate.
- 

• **Sentence Calculation:** This module calculates the sentence and release, charge information and legal documents for each inmate. Also factors in any inmate work credits and allows the administrator to manually change a release date.
- 

• **Release:** A module that tracks all release information for each inmate including the inmate's release date, method of release and which officer releases each inmate.
- 

• **Programs Management:** A module that manages the program and service directory and records any programs an inmate is involved in and each program's schedule.
- 

• **Accounting:** This module tracks any credits and debits made to an inmate's account and shows all transactions made and the daily balance of each account.
- 

• **Jail Administrative:** This module records deposits to inmate accounts and records any property/money releases from the inmate's confiscated property.
- 

• **Report Writing:** Allows users to create custom reports using Crystal Report Writer or any other report writing system approved by the jail.
