

InfoShare® eProsecution Module

The InfoShare eProsecution module is a comprehensive solution that simplifies the entire prosecution process covering every aspect from start to finish, saving valuable time and energy by eliminating the redundancy of entering every piece of information for every case. The AOC interface provides the ability to access person data that is stored within Promis Gavel, eliminating the need to re-enter the information into InfoShare. Document preparation time is also reduced by utilizing template generators to create Accusation and Indictment documents, and Warrant and Arrest reports using the information that has already been entered into the case files. A built-in Document Redaction and Bates Numbering process streamlines the Discovery process. The Central Judicial Process (CJP), paired with Municipal Police Access (MPA), provides the prosecutor with the ability to grant local Police Departments guest access so that they can upload case or investigation materials that they have compiled such as reports and photos.

.Net Framework

- ✓ InfoShare is one of the first case management systems to be built with Microsoft's .NET Framework
- ✓ InfoShare uses Extensible Mark-Up Language (XML) and web service technology to securely exchange case information between disparate data sources regardless of their format

AOC Interface

- ✓ Eliminates dual data entry in two distinct systems
- ✓ Provides prosecution information from Promis Gavel to be imported into the InfoShare case file
- ✓ Places cases in a temporary holding area where the user can then search for the Promis Gavel number and activate it
- ✓ When the case is activated, a case file is created and the user can then go in and add and edit information
- ✓ Provides a refreshed Promis Gavel case list daily
- ✓ Also available is the Scheduling feature which allows the user to access case event information that was entered in Court

Screening

- ✓ Central Judicial Processing & Municipal Police Access
- ✓ Local PDs have direct access to the Prosecutors Office for initial complaint and document submission
- ✓ Alleviates staff hours for the collection of documents from the local PDs
- ✓ Associates uploaded and scanned documents to the criminal case
- ✓ Eliminates the scanning of documents task by prosecutor staff
- ✓ Allows AP's to screen cases and document in a timely manner

Accusation and Indictment

- ✓ Add defendants and charges to the case
- ✓ Charge code templates that are stored as word documents are automatically inserted when generating the Accusation or Indictment document
- ✓ Provides the authorized user the ability to add body text to charge codes templates to be used across all cases

Diversion

- ✓ Pre Trial Intervention page within the application allows the user to input key PTI related information
- ✓ System updates information entered on the Diversion page in real time
- ✓ User can update the status of the diversion to the court's decision that will either close the case or return it to a state for further case processing

Trial and Grand Jury

- ✓ Add and track charges and events that occur during the course of the trial
- ✓ Post sentencing information at the conclusion of the trial

Discovery

- ✓ Upload all Documents and Photos within the discovery tab
- ✓ Ability to electronically redact documents that will be delivered to the public defender
- ✓ Built in billing function that is automatically opened after the documents have been numbered and redacted
- ✓ Ability to print the request, notice, documents or burn the contents to a CD

Document Redaction

- ✓ Highlight information to be redacted by formatted searches such as DOB or SSN, keyword search, or manually placed boxes
- ✓ Redact recurring information in multiple pages of a document
- ✓ Additional features include Batch Uploading, Bates Numbering, and the ability to extract pages from documents

Formatted Document Templates

- ✓ InfoShare's Template Generators will automatically merge information from the pertinent fields within the case file to compile various legal documents using the formatted document templates
- ✓ Included are Warrant Applications, Subpoenas, Accusation and Indictment Forms, etc.
